3RD GENERATION ELECTROSTIMULATION

EMS Revolution® represents a new concept of training that includes all the necessary equipment needed for performing advanced electrostimulation training in sports centers or with personal trainers, with different training programs and intensities, live monitoring software, virtual trainer and automatic results report.

The third generation is the latest technological update in advanced electrostimulation branch. It is the first electrostimulation system that over comes all the limitations of the existing devices in the market. These limitations are related to the freedom of movement which was quite low with cabled electrostimulation systems and on the other hand instability of EMS signal of wireless systems.

We found a way to incorporate all functionalities of the control unit into a compact device that is attached to the electrostimulation suit. That way we are able to offer EMS system with unlimited freedom of movement and a totally stable connection since there is no wireless connection.

The latest generation
of the technology
with a 20 minutes
complete training.

LIVE MONITORING OF PHYSIOLOGICAL PARAMETERS SOFTWARE

The EMS Revolution® live monitoring software collects information on physiological parameters such as heart rate, kcal consumed, training zones and the effect of the training performed.

To carry out the EMS monitoring in real time, the user must wear the heart rate monitor and electrostimulation vest, with the possibility of adding personal physiological data to significantly increase the accuracy of the assessments.

VIRTUAL TRAINER SOFTWARE OF ELECTROSTIMULATION

Virtual trainer with more than 250 videos of exercises to be done. Thanks to the virtual trainer's help, users will be able to use electrostimulation in a safe way and with visible results in a few sessions.

This way would be possible to train several people at the same time with a single trainer.

The data collection and the optimization of training offered by the exclusive EMS Revolution® monitoring software will facilitate customer loyalty.

RESULTS REPORT AND FOLLOW UP

The most attractive thing for the client is to know the effectiveness of the training in his body in an objective way. The report allow us to know how many kcal have been consumed after performing the exercise, the localized training zones and the percentage in each of them.

This type of technology marks the centre of a more objective and attractive aspect, clearly differentiating you from the competition offering a 100% effective product. Unique system that automatically sends results reports to the client with training data performed.
